Dens™ Brand Products Safety Information

By following the guidance below, installation of Dens™ Brand products can be easier and safer. For detailed safety information, we recommend all users of Dens Brand products read the Material Safety Data Sheet (MSDS) located at our website. This overview is not intended to replace the careful reading of the MSDS before using a Dens Brand Product.

Dress Properly

Dens Brand products are manufactured with fiberglass facings. The handling of fiberglass facings can irritate the skin. Additionally, handling and installation of Dens Brand products may produce dust which can irritate eyes, nose, throat, skin and upper respiratory tract. Therefore we recommend the following be worn when using Dens Brand products:

- OSHA approved safety glasses
- Work gloves
- NIOSH approved dust mask or respirator
- Loose-fitting long sleeved shirt
- Long pants.

Maintain a Clean and Safe Work Area

Maintaining a proper work area is essential to the safe handling and installation of Dens Brand products.

- Keep area clear of children, pets or unnecessary persons
- Store boards flat on the floor to prevent the product from sliding or falling
- Always provide supports for board when working overhead
- Maintain adequate ventilation in the work area. If it is not possible to maintain adequate ventilation and the work area becomes dusty, the use of a NIOSH approved respirator and safety goggles is recommended.
- Keep work areas free of scrap material to minimize dust and prevent tripping hazards
- Use a vacuum to clean work area; do not use blowers or compressed air for clean-up.

Important Safety Information

- If dust or fibers are deposited in the eyes, do not rub the eyes. Flush the eyes with water or an eyewash solution. If the irritation persists, consult a physician
- If fiberglass fibers accumulate on the skin, do not rub or scratch. Fibers can be removed from the skin by applying and then removing adhesive tape so that the fibers are removed from the skin by the tape. *Never use compressed air to remove fibers from the skin.*

Product Information

For detailed product information on the Dens Brand family of fiberglass-faced gypsum products, visit www.gpgypsum.com.
